DETAILED ACTION

1. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Ikegaya et al (the US Patent No. 6,600,448).

The Ikegaya et al reference teaches in figure 2 a monopole antenna for a wireless device, the antenna comprising a conductor plate having a first plate portion 6 and a second plate portion 3, the first plate portion 6 having a width between a first edge and a second edge thereof and a height for producing a first resonance band and a second resonance band, the second plate portion 3 being connected to the first edge of the first

plate portion for feeding signals of the first resonance band and the second resonance band, the first plate portion producing the first resonance band corresponding to the length from the first edge to the second edge thereof, and producing the second resonance band corresponding to the length from the first edge to the second edge and back to the first edge. The second plate portion 3 is L-shaped. The first plate portion 6 is rectangular.
